

Quality Policy

August 10, 2020

The management of **ELLWOOD QUALITY STEELS** affirms the concept of Total Quality Management. All levels of the organization are involved in the efforts toward continuous improvement. **ELLWOOD QUALITY STEELS** will continue to be a world class producer of forging ingots, billets, and remelted electrodes of steel, nickel, and copper-based alloys by:

- Promoting safety awareness and providing a safe working environment.
- Orienting itself to meet customer needs and requirements, exceeding our customers' expectations in every case.
- Providing products with consistently high quality and reliable delivery.
- Building technical superiority in the products made and the processes used to produce them.
- Maintaining integrity and ethical behavior among its employees and suppliers.
- Complying with current environmental regulations and all applicable statutory, regulatory, and other requirements.
- Assuring every employee equal opportunity for individual growth and development through training and rewarding high performance on a team basis.
- Manufacturing at the lowest possible cost.

I fully endorse the **Quality Assurance System** which ensures that our policies are effectively implemented on a company-wide basis.

Michael Morgus
President
